15 Years of experience

Professional Bio:

Nirmal is a seasoned environmental conservation leader and partnerships manager with over 15 years of experience in biodiversity, ecosystem services and natural capital assessments, nature-based solutions, sustainable infrastructure development, science and technology partnerships, and data-driven decision-making. He has worked across government, non-profit, and academic sectors, consistently demonstrating a proven track record in managing and fundraising for high-impact international partnerships and delivering strategic recommendations that drive large-scale environmental and policy change.

Nirmal has led initiatives that incorporate spatial analysis of ecosystem services and their integration into policy frameworks in multiple countries and regions across Asia, Latin America, and Africa. His research experience includes spatial and statistical

Skills & Expertise:

Project Management, MEL, Stakeholder Engagement, Climate & Resilience, Infrastructure, Energy, Localization & Capacity Strengthening

analysis related to ecosystem services and conservation, with a strong focus on sustainable infrastructure, strategic planning, and project management.

He is highly skilled in geographic information systems (GIS), building and maintaining relationships with global partners, conducting targeted outreach to key audiences, and organizing and facilitating workshops and capacity-building efforts. Nirmal also provides technical support to partners worldwide and has authored a range of publications, including peer-reviewed scientific articles, book chapters, and technical and policy reports tailored for decision-makers.

Through his work, Nirmal continues to advance the integration of science into policy and practice, with a commitment to sustainability, innovation, and inclusive environmental governance.
